

WOLTURNUS

# A-Run

The multi-talent for children,  
teenagers and adults

# Active or Comfort the multi-talent for all age classes

The A-Run is a unique wheelchair, which fulfills any wishes a wheelchair user can dream of. There are different application possibilities for the A-Run. It can be used as a rather passive comfort wheelchair, for users with special requirements in regard to support and functionality as well as a full-value active wheelchair for users, who manage their daily lives independently.

The A-Run is available in various sizes. The different age groups usually have varying demands on a wheelchair. Wolturnus makes it possible to adjust the wheelchair as well as the equipment in line with the respective requirements of children, teenagers and adults respectively.

Each A-Run, which leaves our production hall, is a unique, highly individualized wheelchair.

This wheelchair model has been developed in a way, that nearly all features can be adapted according to the user's demands: the back, the seat, the equipment as well as the functionality can be designed and adapted individually.

The A-Run Chassis is compatible with many seat and back systems on the market.

With regard to the wheelchair's design, it was very important, to facilitate the everyday lives of both, the user as well as the attendant. The A-Run is very narrow, light and easy to handle. It can be used indoors as well as outdoors.
